

Mohammad Qurani

Frontend Developer | React.js & Next.js

Frontend Developer specializing in React.js, Next.js, and modern JavaScript applications. Experienced in building responsive, user-focused web applications across fintech, investment, crowdfunding, e-commerce, and administrative platforms. Hands-on experience working with real-time financial data, REST APIs, authentication, state management, and performance optimization. Comfortable working in cross-functional teams and translating business and design requirements into scalable frontend solutions.

Work Experience

FanApa — Tehran, Iran

Frontend Developer

Jul 2025 - Sep 2026

Continued working as a Frontend Developer after successfully completing the internship program.

- Developed and optimized frontend modules for capital market, gold investment fund, and fixed-income fund platforms.
- Built responsive and interactive user interfaces using React.js and Next.js. Integrated financial data and REST APIs to provide accurate and near real-time information to investors.
- Improved user experience and frontend performance across financial applications.
- Collaborated with backend developers and UI/UX designers to implement new features and resolve technical issues.
- Worked on complex fintech workflows with a strong focus on usability, reliability, and data accuracy.
